twig™

The screenshot displays the TWIG Point SP management interface. It features a map view with several red circular geofences overlaid on a building layout. A list of devices is shown below the map, including 'TWIG Embody' and 'TWIG SOSCard'. The interface includes a search bar, a list of attributes for the selected device, and a set of control buttons (Start, Delete, Edit, Stop) for each device. A detailed configuration panel for the 'TWIG Embody' device is also visible, showing location information and various management options like 'Locate', 'Track', 'View events', 'Manage OSM', 'Configure', 'Reset', and 'View map locations'.
