

TWIG Neo

TWIG Neo is a wearable lone worker alarm device for various lone worker safety and security needs.

Despite its small size, TWIG Neo provides all the essential lone worker safety functions and can be integrated in many alarm monitoring systems.

Communication in emergency

- Calls, SMS and data transfer over 2G/3G/4G
- VoIP calls and data transfer over Wi-Fi
- 2-way handsfree calls
- SOS cycle with pre-programmed numbers
- Mandown alarm in falls, impact and no movement situations
- Tracking and location indoors and outdoors
- TWIG MPTP protocol integrated in various alarm systems

Small and discreet

TWIG Neo is light to wear and fast to reach when needed

Several alarm options

Alarm detection in fall, non-movement, free fall and impact, Amber alert, rip alarm

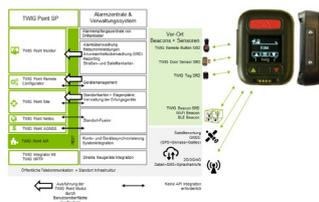

Several carrying options

Pendant, carbine hook, belt clip, wrist band and ID card holder

Compatible

Thanks to its MPTP protocol TWIG Neo is compatible with various alarm systems.

Simple and flexible

With remote configuration possibility TWIG Neo is fast to deploy and flexible to operate.

Lone worker safety

TWIG Neo, equipped with a lanyard and ripcord, is ideal for front office, healthcare, and social work staff.

TWIG Neo personal alarm

Various carrying options, scalability and small size make TWIG Neo the optimal choice for laboratory, maintenance and health care personnel.
